Physical Properties of Matter

| 5.5 Matter and energy. The student knows that matter has measurable physical properties and those properties determine how matter is classified, changed, and used. |

Process (Tools to Know)

| 5.2(A) describe, plan and implement experimental investigations |
| 5.4(A) collect, record, and analyze information using tools |

Content

| Properties of Matter |
| 5.5(A) classify matter based on measurable, testable, and observable physical properties, including mass, magnetism, physical state (solid, liquid, and gas), relative density (sinking and floating using water as a reference point), solubility in water, and the ability to conduct or insulate thermal energy or electric energy |
| 3.5(C)^ predict, observe and record changes in the state of matter caused by heating or cooling such as ice becoming liquid water or condensation forming on the outside of a glass of ice water or liquid water being heated to the point of becoming water vapor |

Mixtures

| 5.5(B) demonstrate that some mixtures maintain physical properties of their ingredients such as iron filings and sand and sand and water |
| 5.5(C) identify changes that can occur in the physical properties of the ingredients of solutions such as dissolving salt in water or adding lemon juice to water |

Process (Ways to Show)

| 5.2(D) analyze and interpret information/construct reasonable explanations |
| 5.2(G) construct graphs, tables, maps, and charts to organize, examine, and evaluate information |
| 5.3(B) draw or develop a model |

>> TEKS clusters typically requiring additional time and focus in the curriculum
Student Learning Report: Grade 5 Science
Name ____________________ Grading Period _______

**>> Force, Motion, and Energy**

| 5.6 Force, motion, and energy. The student knows that energy occurs in many forms and can be observed in cycles, patterns, and systems. |

### Weather

- 5.8(A) differentiate between weather and climate
- 4.8(A)^ measure, record, and predict changes in weather

### Water Cycle

- 5.8(B) explain how the Sun and the ocean interact in the water cycle
- 4.8(B)^ describe and illustrate the continuous movement of water above and on the surface of Earth through the water cycle and explain the role of the Sun as a major source of energy in this process

**Process (Ways to Show)**

### Process (Tools to Know)

- **5.2(A)** describe, plan and implement experimental investigations
- **5.4(A)** collect, record, and analyze information using tools

*connected 5.1(A), 5.1(B), 5.2(B), 5.2(E)*

### Content

**Rotation of the Earth**

- **5.8(C)** demonstrate that Earth rotates on its axis once approximately every 24 hours causing the day/night cycle and the apparent movement of the Sun across the sky
- **4.8(C)^** collect and analyze data to identify sequences and predict patterns of change in shadows, seasons, and the observable appearance of the Moon over time

**Sun, Earth, and Moon**

- **5.8(D)** identify and compare the physical characteristics of the Sun, Earth, and Moon

**Planets**

- **3.8(D)^** identify the planets in Earth’s solar system and their position in relation to the Sun

### Process (Ways to Show)

- **5.2(D)** analyze and interpret information/construct reasonable explanations
- **5.3(B)** draw or develop a model

*connected 5.2(C), 5.2(F), 5.2(G), 5.3(A), 5.3(C)*

#### Tools to Know

- **5.1(A)** demonstrate safe practices and the use of safety equipment as outlined in Texas Education Agency-approved safety standards during classroom and outdoor investigations using safety equipment, including safety goggles or chemical splash goggles, as appropriate, and gloves, as appropriate
- **5.1(B)** make informed choices in the conservation, disposal, and recycling of materials
- **5.2(A)** describe, plan, and implement simple experimental investigations testing one variable
- **5.2(B)** ask well defined questions, formulate testable hypotheses, and select and use appropriate equipment and technology
- **5.2(E)** demonstrate that repeated investigations may increase the reliability of results
- **5.4(A)** collect, record, and analyze information using tools, including calculators, microscopes, cameras, computers, hand lenses, metric rulers, Celsius thermometers, prisms, mirrors, balances, spring scales, graduated cylinders, beakers, hot plates, meter sticks, magnets, collecting nets, and notebooks; timing devices; and materials to support observations of habitats or organisms such as terrariums and aquariums

#### Ways to Show

- **5.2(C)** collect and record information using detailed observations and accurate measuring
- **5.2(D)** analyze and interpret information to construct reasonable explanations from direct (observable) and indirect (inferred) evidence
- **5.2(F)** communicate valid conclusions in both written and verbal forms
- **5.2(G)** construct appropriate simple graphs, tables, maps, and charts using technology, including computers, to organize, examine, and evaluate information
- **5.3(A)** analyze, evaluate, and critique scientific explanations by using evidence, logical reasoning, and experimental and observational testing
- **5.3(B)** draw or develop a model that represents how something that cannot be seen such as the Sun, Earth, and Moon system and formation of sedimentary rock works or looks
- **5.3(C)** connect grade-level appropriate science concepts with the history of science, science careers, and contributions of scientists
